

Exclusive free upgrades with Coretex.

To get the most out of your commercial motor vehicle fleet you need to get the best out of every vehicle.

We've partnered with Coretex to offer customers an exclusive deal on telematics packages that can help you and your team drive smarter. Telematics is like the black box of an aircraft, an on-board system that captures data from your fleet and helps you make decisions that save you money – by reducing fuel consumption and lowering maintenance costs.

With Coretex on-board we'll cap your excess and reduce your single vehicle accident excess (SVA).

BENEFITS

- 1 Cap your excess and reduce your SVA excess by using telematics.
- 2 Get real cost savings by encouraging improved driver behaviour, reduced fuel usage and maintenance.
- 3 Free exclusive upgrade to the next tier bundle when you sign up with Coretex.

NEW TO TELEMATICS?

Receive the benefits above, plus when you sign up to any Coretex telematics bundle get an exclusive, free upgrade.

ALREADY USING TELEMATICS?

We'll cap the excess and reduce the SVA excess for any new or existing customer with a telematics system.

ALREADY WITH CORETEX, BUT NOT WITH US?

Take out a Vero Commercial Motor policy and you'll get the reduced and capped excess benefits, and your existing Coretex bundle will be upgraded free of charge – at renewal.
